

The Acol Roof Window is an 'opening style' skylight which is arguably the best of its kind available in today's market. It is truly an innovation as it offers the following unique value added features:

- Manufactured in Australia - for Australian conditions.
- Built from strong box section aluminium - extra strong to beat the elements.
- Standard glazed with a 6mm tough high impact acrylic.
- Innovative and modern skylight design.
- Full range of colorbond colours and sizes.
- 97% UV protection for your family (with standard glazing).
- 100% weather proof.
- All frames are powder coated for an attractive and durable finish.
- Bonus flyscreen fitted to all Acol windows.

### Versatile

The Acol Roof Window is supplied with a one piece roof flashing assembly. Profiles are available to suit every roof type.

Flashing assemblies are available for: tile, corrugated iron, metal deck, metal tile and slate etc. and are available to suit roof pitches from 2 to 45 degrees. A water deflector is available for very steep pitches of more than 45 degrees upon request.

### UV protection for your family and home

The Acol Roof Window is the only 'opening' skylight available which features a specially designed high impact glass panel which reflects the sun's harmful rays (there are also several different types of glass including double glaze). This is an ideal way to take advantage of the sun's light and warmth, with the knowledge that no UV sun damage is occurring to your family / staff, furniture or carpets.

### Increased Ventilation

The Acol Roof Window features the flexibility of a Skylight which can be opened easily from the inside. This option promotes interior ventilation and air flow.

### Beating The Elements

The Acol Roof Window is weatherproof (with security) when partially opened, even in light rain fall. The Roof Window's sash profile is shaped to shed rain, ice and snow. And of course there's no painting of the Acol Roof Window required.

### Installation Flexibility

The Acol Roof Window is designed to be installed into almost any new or existing structure and allows designers, architects, renovators and builders the opportunity to bring light, air and life into any part of a building. There is a standard scissor winder opening and closing operation, with optional infrared remote controlled motorised operation if required.

### Flyscreen

Every Acol Roof Window is supplied with a flyscreen already installed. Flyscreens are finished in matching a colour to main colour.

### Powdercoat internal finish

Available in white or beige.

### Hi Torque Winder

Only high grade winder components are used in our windows and there is a comprehensive I of accessories available.

### Hi Impact Acrylic

Clear 97% UV block out standard Acol Roof Windows are glazed with tough high impact." acrylic, however several different types of alu's' (including double glaze) are also available.

### Rot Free Super Strong RHS Aluminium Frame

Because Acol Roof Windows are built from this superior type of aluminium you never need to worry about frames splitting or rotting.

### Colorbond or Zinalume Steel Roof Flashing

All roof flashings are manufactured in high grade BHP Colorbond or Zinalume steel guaranteeing years of trouble free service. A full range of colours are available to complement any project.

**Standard Acol Sizes**
